

PHOTOSYNTHESIS

How do you put up your beautiful Christmas tree?

Step 1: Colour the trees with the colours of your choice

Step 2: Cut out all around the fir trees and dotted lines.

Step 3: Glue your trees on thick paper or cardboard

→ If you're really motivated, you can glue them on wood!

Step 4: Cut out the support where you glued your fir trees

Step 5: Cut a slit in your support at the level of the dotted lines.

Step 6: Assemble the two parts to get your tree!
